

TOWN OF CARDSTON

BYLAW #1649

DEFAULT SUPPLIER TARIFF

RATE SCHEDULE

SCHEDULE "G"

ENMAX Energy Corporation

Default Supplier

Rate Schedule

Cardston

Default Supplier Rate

This rate schedule is for the provision of electricity services in accordance with the Role, Relationships, and Responsibilities Regulation, 2013 (AR 169/2003).

Applicability

1. The Customer is not an eligible Customer as that term is defined in the Regulated Default Supply Regulation (AR 168/2003) and;
2. The Customer is unable to purchase retail electricity services from the customer's retailer for any reason or the customer is unable to obtain retail services for any reason.

Rate

Fixed Rate Energy Charge	FREC
Variable Rate Energy Charge	VREC
Distribution Tariff Charges	DT
Local Access Fee (LAF)	DT

Terms and Conditions

All services provided under this rate are subject to the ENMAX Energy Corporation Default Supplier Terms and Conditions. Each Customer is bound by, and shall comply with, all provisions of the Distribution Tariff applicable to the Customer.

Default Supplier Energy Charges

The following Default Supplier formulae are used to calculate the energy charge for a billing period.

$$FREC(\$) = MXC_h * FEE$$

$$VREC(\$) = HR * AECO 'C'_{bpavg} * TC_{bp}$$

Where:

MXC_h = Maximum consumption in any hour during the billing period.

FEE = \$14.931/kVA/billing period.

HR = Heat Rate = 8.0.

$AECO 'C'_{bpavg}$ = Average of AECO 'C' Daily Index in the billing period, where:

AECO 'C' Daily Index =

- (i) for each Monday, Tuesday, Wednesday and Thursday which is not statutory holiday (in Alberta), the average price in Canadian dollars per GJ published on the "Canadian domestic gas price report" page, in the table "NGX AB-NIT Same Day Index", (as may be amended or replaced) reported for such day;
- (ii) for each Friday, Saturday, Sunday, and Monday which is not a statutory holiday (in Alberta), the average price in Canadian dollars per GJ published on the "Canadian domestic gas price report" page, in the table "NGX AB-NIT Same Day Index", (as may be amended or replaced) on the identified as "Weekend#" for the weekend occurring closest to such day, all as reported in the first edition of the Canadian Gas Price Reporter ("CGPR") published in the month immediately following the month in the day which it falls;
- (iii) for each Tuesday, Wednesday and Thursday which is a statutory holiday (in Alberta), the AECO 'C' Daily Index for such day shall be the AECO 'C' Daily Index for the previous Business Day in which case it may be necessary to use the CGPR for the preceding month to locate the AECO 'C' Daily Index for the closest Business Day or weekend; and
- (iv) in the event CGPR ceases to publish the "Canadian Domestic gas price report", or in the reasonable opinion of ENMAX Energy Corporation ("EEC"), there is a material change in the method of calculating the figures found in the "Canadian Domestic gas price report", the AECO 'C' Daily Index shall be the price in the Canadian Dollars per GJ for each applicable day as published in an alternate source selected solely by EEC, acting reasonably.

TC_{bp} = Total consumption, in kWh, in the billing period.

ENMAX Energy Corporation reserves the right to flow through to Customers (including former Customers) any volume and price adjustments that result from initial settlement, final settlement and post final settlement.

Distribution Tariff (DT) Charges

ENMAX Energy Corporation passes through all Distribution Tariff Charges, as applicable to a customer's rate schedule, on an as-billed basis. The Distribution Tariff Charges include any applicable Local Access Fees (LAF).
